The Critic On Camera: Tech Requirements

Running time: Approx. 20mins

General Requirements

- Total get in time should be a minimum of one and a half hours prior to the performance. We need power for a PA system and a smoke machine. Please advise us if access to the performance area involves any staircases or long distances so that we may allow some extra time during the get-in and get-out.

Dressing Room Requirements

- A clean dressing room in close proximity to the performance area for 4 actors with running water and a toilet. If possible showering facilities. A bowl of fruit and bottled water.

Performance Space

- 4x6m of flat performance space surround by suitable seating area to be stewarded or cordoned off by barriers supplied by the venue at all times when performers aren't present.

Other Information

- The get-out takes approximately 60 minutes but is heavily dependent on access. We will require parking for 2 cars throughout the day if available. Our technical manager will operate our sound.
